**Popular upgrade option**

**PATENTED**

**CodeLink™**

An integrated solution for the alignment bay to reset steering angle sensors quickly and easily. One CodeLink device replaces expensive calibration tools costing thousands of dollars. (sold separately)

**All new electronics including Hunter's latest USB interface hardware kit. (as required)**

## TPMSpecs™

Pull together **thousands** of TPMS procedures into a simple, yet comprehensive, user-friendly tool.

For additional information on WinAlign 11, see Form 5908-T.

## Latest specs available online

Download, access and communicate alignment service information through the Internet.

## Recall specs automatically

Scan the VIN to instantly recall OE specs and custom alignment procedures for each vehicle. (barcode reader sold separately)

**Includes the latest WinAlign software.**

**Because of continuing technological advancements, specifications, models and options are subject to change without notice.**

Contact your local Hunter Representative to determine which upgrade kit is right for you.
