Hunter Engineering Company
11250 Hunter Drive
Bridgeton, MO 63044

I can't stress enough how pleased I am with our new Hunter Alignment System. It's everything that was promised and more! With the new alignment system, all my technicians are capable of performing alignments. The speed and ease of operation has changed the attitudes towards alignment for everyone in the shop. A service that was once a "necessary evil" is now thought of as opportunity. In addition to the aligner, having an alignment rack with all the automated features, makes set-up even simpler and faster. What a Great System!

We have increased our alignment penetration seven-fold...and that's with our existing customers. As word travels about the equipment, I expect that number to increase. The ability to offer fast alignment checks and alignments allows us to offer services which previously would not be possible. My customers are benefiting from the new equipment and so is the shop's bottom line.

I would also like to comment on the professionalism of Hunter's sales and service representatives. Their support before and after the sale is phenomenal. Thank you.

Sincerely,

George Johnston
