RE: New Hunter Wheel Aligner

Dear John;

Just wanted to let you know what a smart decision buying our new wheel alignment system was. Before our purchase we spent a lot of money and time having an outside source do all our pre and post accident wheel alignments.

Since purchasing our new system we have saved not only time but thousands of dollars that we were able to keep as profit instead of giving that to another vendor. Some of the key features in helping us with these savings we feel are the: inflation stations, power slides, fully integrated control panel and WinAlign software. These features are successful in making us more efficient and accurate which is what we strive for in everything thing we do. The wheel alignment system is also very user friendly and very simple to learn after a few short days of instruction.

Purchasing our new scissor rack wheel alignment system was the best decision for our company and we thank you for taking the time to let us know just what an asset your system would be to our company.

Sincerely,

Leslie E. Daniel III

Owner
