Hunter Engineering Company
Fred Goepel
Somerset, NJ 08873

Dear Fred,

This note is to let you know how pleased we are with our Hawkeye wheel alignment system. Based on our past experience I believed Hunter was the right choice as the supplier of this equipment. And I am happy to report that my analysis proved correct.

Business out of our alignment bay has doubled. Our technicians are confident when presented with a job that they have the ability to do it. Just as important, our customers are confident that we can do the work and bring us repeat business.

But most importantly, this investment has made me money. We are happy and now looking forward to adding Code Link steering angle sensor reset. Thanks to the Hunter team for continuing to innovate and offer solutions we can use to help our customers

Best wishes,

Rick Comollo
