Dear Ray,

We are extremely pleased with our new Hunter OCL410LT Pro on vehicle brake lathe. I like the fact that the panel display reads right side up no matter which way the lathe is rotated. This is very helpful for students. I have been satisfied with Hunter equipment in the past. I appreciate your timely return visits to make sure everything is fine with all of our Hunter wheel service equipment. It's also nice that you have a quick response time to your messages. It has been a pleasure to do business with you.

Sincerely,

Gary Heinz
