

June 15, 2010

Mr. Clark,

After our last conversation, I just wanted to say these new TCA Auto 34 Tire Changers are absolutely incredible. As you know, we couldn't mount the new Mustang Shelby 20" Wheels on our automated tire line. This was going to cost the plant several hundred thousand dollars to upgrade our tire line to accommodate these new wheels. When we asked you for a possible solution, you told me about the new Auto 34 Tire Changer. This turned out to be a great option for the Mustang Wheel. The plant purchased 2 changers, one for the line and the second for repairs and back up. This option cost the plant under \$40,000, which was a huge savings for us.

The Auto 34 Tire Changer would be nothing without trained operators and service after the sale. The installation and training that you provided was great! The service that you have provided the plant before and after the sale is fantastic! I look forward to working with you and Hunter long into the future.

To you and everyone at Hunter, I just wanted to say THANK YOU!

Thankfully yours,

Jim Polce
