

Hunter Engineering Representatives

Since opening our store, Pompano OK Tires in 1960, we, as well as the tire and automotive industry, has seen many changes. Thanks to Hunter Engineering and their products, these changes have been welcomed.

From the car spin balancer, the strobe light system, the GSP 9700 balancer, the TC 3500 tire changer to the now advance auto 34 (of which we have 2), our tire mounting and wheel balancing services have become state of the art, allowing our tire customers complete satisfaction.

Local Hunter Representatives like Kevin Knebel, are always available to respond to any issues or questions, promptly and efficiently.

It is with great confidence that we praise Hunter Engineering not only for their cutting edge products, but also for their superior customer service.

We look forward to continuing this mutually beneficial business relationship for many years to come.

Jeff Miranda
Proprietor
Pompano OK Tires
