Hunter Engineering,

Please let me express my appreciation for the new Tire Machine, the TCA Auto 34. We finally have the right tool for the job!

When we replaced the older Hunter Tire Machine, the TC3500, we were hopeful about its improvements and features. It has honestly exceeded our expectations. The TCA34 is very easy to use and train on. It is super tough, durable and more than capable of safely mounting and dismounting the toughest tire and wheel combinations. Our shop still does a number of Michelin PAX assemblies and the TCA34 is the only machine we would use. It has made the entire PAX process much faster and safer than our previous machine.

We truly are a Hunter Shop. Along with the TCA 34, we have a GSP9700 Road Force Balancer, 2 Hunter On- the- Car Lathes, and Hunter Alignment System. Thank you for continuing to improve on your product lines.

Sincerely,

Brian L Pearce
