FIG. 1 is a perspective view of the machine vision vehicle wheel alignment system camera support structure of the present invention;

FIG. 2 is a front elevation view of the machine vision vehicle wheel alignment system camera support structure of FIG. 1; FIG. 3 is a rear elevation view of the machine vision vehicle wheel alignment system camera support structure of FIG. 1; FIG. 4 is a top plan view of the machine vision vehicle wheel alignment system camera support structure of FIG. 1;

FIG. 5 is a bottom plan view of the machine vision vehicle wheel alignment system camera support structure of FIG. 1; FIG. 6 is a left side elevation view of the machine vision vehicle wheel alignment system camera support structure of FIG. 1; and,

FIG. 7 is a right side elevation view of the machine vision vehicle wheel alignment system camera support structure of FIG. 1.

The broken lines in the drawings depict unclaimed environmental subject matter.

The broken line vertical support structure is shown broken away to indicate no particular length.
