HawkEye Elite® Alignment Systems
Greater profit and productivity through innovation

NOW AVAILABLE WITH PUSH REPORTS
Hunter's latest productivity features!

**Revolutionary adaptor design!**
- Faster setups!
- No metal-to-metal contact!
- No knob twisting!

**Superior target design!**
- Lighter design!
- Narrower profile!
- Faster readings!

---

**HawkEye Elite**
Recall specs in a snap!
Recall OE specs and vehicle-specific alignment procedures instantly.*

Patented Safety System Alignment integration!
Reset computerized steering systems on a wide variety of vehicles with one simple tool.

Faster Caster!
Saves time, increases speed and reduces battery drain from brake light draw.

QuickComp™!
Compensate all wheels and capture initial measurements in one motion.

Patented High-resolution cameras!
Four high-resolution cameras provide alignment measurements with pinpoint accuracy.

NEW HunterNet™ connectivity!
Automatic push reports plus online business intelligence tools.

* Standard with WA600 consoles, optional with WA500 consoles.
Hunter’s patented QuickGrip® adaptors and three-dimensional targets accelerate service with set-up times in seconds instead of minutes...

**PATENTED**

**QuickGrip® wheel adaptors & three-dimensional targets**

**Extremely Fast Installation**
- Spring-loaded arms grip the tire
- Thumb switch secures the clamp
- Off-center clamping has no effect on accuracy

**Avoid Damage to Expensive Rims**
- Grips tire, not rim
- No metal-to-metal contact
- Only protective ring contacts rim

**Less Weight**
- Weighs only 6 lbs.
- Nearly 50% lighter than previous designs

**Space-Efficient Profile**
- Approx. 9” profile
- Easy to work around
- Great for narrow bays
QuickGrip®
wheel adaptors & three-dimensional targets

Low Maintenance
- Shop-tough polymer structure withstands drops
- No electronics, cables or calibration
- Only occasional cleaning required

Quick-Change Arms
- Interchangeable arms cover up to 37" assemblies
- One arm fits approximately 90% of applications

Deep-Wheel Extension
- Deep rims or protruding hubs, no problem
- Standard accessory

Wide-Angle Targets
- Perform max steer procedure, as needed
Previous setups used valuable shop time...

Conventional electronic-sensor system – 10-minute-plus procedure

- Chock wheels and lift vehicle
- Jack up front and rear of vehicle
- Check air pressure and recall specs
- Mount all 4 sensors, compensate each sensor, and remove pins
- Lower rear and front of vehicle and jounce
- Steer caster
- Print results

**10:05 Total**

Older technology requires long set-up times...

Camera-sensor systems speed up the process

- Chock wheels and lift vehicle
- Check air pressure and recall specs
- Mount targets
- Roll backward, then forward to compensate
- Remove pins
- Steer caster
- Print results

**4:00 Total**

Early camera technology improved efficiency...
...Today, present your results in just 70 seconds!

**Hunter's HawkEye Elite® and Premium RX Lift** capture all readings and produce measurements in 70 seconds!

**Hunter's 70-second procedure**
- Chock wheels and raise lift to work height
- Mount targets and set air pressure
- Roll forward to compensate sensors
- Scan VIN to recall specs and perform faster caster steer
- Vehicle results print automatically

1:10 Total

**Fast printouts in 70 seconds!**

Use detailed printouts featuring your company’s logo to sell more work.

**Activity Tracker**
- Trip around the vehicle: 1
- Trips to the console: 0
- Total walking steps: 72
FIA streamlines the entire alignment process. Communication links automate tasks once performed by the technician manually, eliminating time-consuming trips around the vehicle and to-and-from the console.
**PATENTED**

**RX Scissor Lift console**
- Raising the vehicle triggers the sensors to look for wheel targets
- Control PowerSlide® and Inflation Station settings on the lift console
- Store bar-code scanner and CodeLink tool near the vehicle to save steps

**PATENTED**

**WinAlign® console**
- Centralized control of entire system
- Communicate directly with lift to set tire pressure and automatically operate turnplates and slipplates
- Guide the technician through the alignment process

**PATENTED**

**PowerSlide® system**
- Slipplates and turnplates automatically lock and unlock at appropriate times
- No more struggles with lock pins

**PATENTED**

**Inflation Station**
- Automatically inflate all four tires simultaneously
- Record starting and final pressure
- Hose recoils to keep work area clear

Requires FIA lift. See RX or Four-Post lift brochures for details.
Hunter's Safety System Alignment: Over 100 million vehicles require Safety System Alignment... and growing!

Electronic Stability Control

- Since 2009, Hunter has supported electronic steering system resets as required by the OEM
- Several systems use electronic steering system output to determine the vehicle's travel direction

A growing number of vehicles also require additional resets

Advanced Driver Assistance Systems

- Many vehicles are now equipped with ADAS
- Many systems require a calibration after wheel alignment
- Often require a short drive be completed as part of the calibration
Hunter's Safety System Alignment: The last step in alignment service

An increasing number of vehicles include advanced driver assistance systems (ADAS). In addition to a mechanical alignment, manufacturer’s specifications often require a Safety System Alignment on many vehicles equipped with ADAS Systems.

**ADAS systems most likely to require reset**
- Lane Departure Warning (LDW) - Camera-based
- Forward Collision Warning (FCW) - Radar-based
- Adaptive Cruise Control (ACC) - Radar-based

**The only integrated, complete alignment procedure**

CodeLink’s patented integration “links” the vehicle OBD-II system to the aligner to align safety system related sensors to the vehicle’s alignment geometry.

**CodeLink® advantages:**
- Integrated with Hunter WinAlign® systems
- Simple instructions shown on aligner screen
- Only one tool required
- Wireless communication with aligner
- Resets ADAS systems and other related sensors*
- Alignment printouts document reset

* Refer to Form 1708-T for coverage information.
When it comes to award-winning software, WinAlign® is unmatched!

The importance of software…

- The most extensive vehicle information database for North America's 220 million vehicles.
- Patented and award-winning power tools complete the work accurately the first time, every time.
- WinAlign maximizes profit and productivity in your alignment bay.

New Faster Caster procedure!

- Eliminates wait times during caster steer
- Saves time and increases speed
- Reduces brake pedal depressor installation by 86%
- Reduces battery drain from brake light draw

No more waiting for left, right, and center readings during caster steer

Steer left, right and back center
ExpressAlign®
Perform every alignment with a streamlined procedure. ExpressAlign analyzes each job and presents the optimal action sequence with the minimum steps required.

Tools and Kits Database
Save trips back and forth to the tool box. Hunter presents all of the tools and aftermarket correction kits needed for each alignment.

Virtual View®
See your alignment job in 3-D using real-time 3-D graphics. Used by experts and novices alike.

Control Arm Movement Monitor®
Cut adjustment times in half for front-shim, dual-cam or dual-slot vehicles. Step-by-step graphics let you get it right on the first try.

Wheel-Off Adjustment
Speed the alignment process by making adjustments with the wheel removed.*

WinToe®
Ensure a straight steering wheel every time without repeated adjustments or using a steering wheel holder.

A timesaver on nearly every alignment

Tools and Kits Database
Save trips back and forth to the tool box. Hunter presents all of the tools and aftermarket correction kits needed for each alignment.

Virtual View®
See your alignment job in 3-D using real-time 3-D graphics. Used by experts and novices alike.

Control Arm Movement Monitor®
Cut adjustment times in half for front-shim, dual-cam or dual-slot vehicles. Step-by-step graphics let you get it right on the first try.

Wheel-Off Adjustment
Speed the alignment process by making adjustments with the wheel removed.*

For three-dimensional targets, both Wheel-Off Adjustment Kit and SCA Adaptor Kit 20-2664-1 is required.
Take your alignment business to the next level!

Perform body shop and specialty alignments…

Suspension Body Dimension Audit
Quickly screen vehicles to determine alignability and collision repair needs.

Symmetry Angle Measurements
Instantly access symmetry angles and setback for your body shop customers.

Live Ride Height Adjustment
Measure and adjust ride height in real-time.

Shim-Select® II
Eliminate confusing shim charts and tables. Shim Select II quickly calculates and displays the template you need for proper shim installation.

Over 30 million vehicles benefit

Automatic Bushing Calculator®
Calculate the proper bushing size and position adjustment without wasting time with a zero bushing.

Over 10 million light trucks and vans benefit

WinAlign® Video Library
400+ videos and animations cover all aspects of wheel alignment today.

Over 20 million vehicles require ride height measurement to complete alignment service
Help your customers make informed decisions!

WinAlign® printouts help sell work
Explain needed parts and repairs and show completed work to customers using detailed, color-coded printouts.

Clear and detailed printouts help you communicate and build rapport with your customers and sell more alignments

Push Reports
- Automatic performance snapshots delivered daily via email or text
- Easy-to-understand report measures output and achievements
- Track alignment conversions, balancing utilization and inspection opportunities

Your online business intelligence tool
HunterNet™ allows shops to obtain real-time data through connected equipment results, trends and management reports.
- Easily track alignment activity and generate reports
- Cloud storage eliminates multiple paper printouts
- Email Quick Check® and alignment results, photos and videos to customers
- Access the latest alignment specifications and adjustment info online with WebSpecs®

*HunterNet™ connectivity empowers you to make data-driven decision to increase your productivity and profitability
Use your aligner to perform Quick Checks!

Add inspection capability that identifies profitable service opportunities in under two minutes!

20-2813-1 Diagnostic Check*
CodeLink® retrieves emission codes and wirelessly transfers important vehicle information to console. Also can be used with Safety System Alignment®-capable alignment machines.

20-2782-1 Handheld Tread Depth*
One- or three-point manual tire tread depth check. Conditions transmitted to console automatically.

*Requires WinAlign® 14.1 software or higher in Quick Check® mode.
Choose the right alignment console for your shop!

Remote Indicator sold separately. For product dimensions, weights and site requirements, please contact your local Hunter Sales Representative.
Choose the right sensor package for your shop!

Fixed-column configurations fit most service bay applications.

Motorized and manual movable-camera configurations provide a full range of vertical travel for additional lift height.

Cabinet-mounted configuration is mobile to service multiple alignment bays and provides a full range of travel for additional lift height.

Wall- and ceiling-mount configurations are perfect when space is at a premium.

Floor-mounted overhead configurations are ideal for drive-through bays or to accommodate unique applications.

One set of adjustable clamp arms covers the same clamping range as standard multi-arm kit.
