Quick Check Drive® Inspection
Autonomous Alignment and Tread Depth for Tire & General Repair

Featuring Flightboard™ — At-A-Glance touchless inspection results
Unmanned Inspection At-A-Glance

PATENTED

Automatic Alignment Results

- Quick Check Drive® — Touchless total toe and individual camber
- Quick Tread Edge® — Measures tread depth, analyzes data on-site, and instantly displays results
- Boost most profitable undercar services
- No additional labor required

Vehicle OE warranty policies vary, please consult OE guidelines when establishing vehicle inspection policies.
Automatic body photos protect against mistaken damage claims

**Vehicle Identification** — Automatically determine OEM specs on most vehicles

**Optional Body Camera Feature**

**Get Results Your Way**

**Flightboard™** — Customers see findings live

**Shop Results** — View and present inspection results from any PC with internet connection

**Push Reports** — Daily delivery of inspection rates, opportunities, alignment numbers, and conversions by email and text

External identification camera sold separately.
Autonomously Identify Today’s Most Profitable Service Opportunities

$1,500* Potential Tire Revenue Opportunity Per Day

Tire failure rates based on Hunter study of 25,000 vehicles
Alignment failure rates based on Hunter study of one million Quick Check Drive results.

$1,000* Potential Alignment Revenue Opportunity Per Day

Tire sales are critical to customer retention. Plus, the first to show the tire need and ask for the sale gets the order 85% of the time. (NADA 2017)

Alignment service has the highest margin in your shop. 68% of an alignment sale is profit. (MTD 2016)

$1,000*
Potential Alignment Revenue Opportunity Per Day

Based on 20 vehicles per day shop average, an average tire replacement of $150 in revenue, and an average four-wheel alignment of $100 in revenue.

Return On Investment

Selling and Reporting Tools

Increase your productivity and revenue with HunterNet® selling tools.

- Display and view results automatically
- Present and email inspection details digitally
- Inform customers with photos and videos

Measure inspection performance and pinpoint improvement opportunities with reporting tools.

- Push Reports NEW!
  - Automatic performance snapshots
  - View inspection rates and opportunities
  - Measure alignment numbers and conversions
  - Daily delivery by email and text

- Track Statistics and Generate Reports
  - Closely analyze inspection rates and opportunities
  - Analyze Quick Check® results and failure rates for specific test types

NEW Partner Integration

- Integrate with leading industry software
- Secure more service authorizations
- Provide a better customer experience

Hunter Partners

- autopoint
- DealerTire
- AutoLoop
- frogdata
- DEALER-FX
- DataClover
- AutoServe

... and more!
**Autonomous Alignment Audit**

**Compact and Powerful**

- Laser and optical technology provides unmatched accuracy
- System distinguishes tire from other elements of the vehicle
- Hunter’s complete OEM specification database saves time and avoids comebacks

**Four High-Definition Cameras**

- License plate images identify vehicle
- Optional: 40 or more still images captured as vehicle drives past to defend against false damage claims

**8 Cameras and 32 Laser Sensors**

- Accurately inspect camber and total toe
- 16 measurements taken to increase accuracy
- Repeatable results

**Intelligent and Fast**

- Scan a new vehicles every 3 to 5 seconds
- Only activates when vehicle is present

**How It Works...**

As the vehicle drives through, cameras measure distances to the tire to calculate total toe and individual camber.

Hunter’s patented system acquires up to 16 results. Measurement outliers are removed and the other results are averaged to provide utmost accuracy.
Quick Tread Edge® — Hunter’s tread depth unit with tire edge wear detection — automatically measures the tread depth of each tire from edge to edge in seconds.

- Captures accurate tread information on all vehicle traffic
- Increases accuracy by eliminating guesswork and manual inspection
- Detects tread grooves and reports up to six measurements per tire
- Results sent to console and graphically shown for customer
- Built with corrosion-resistant stainless steel, includes self-cleaning air knife

Added Benefits
- Flush-mounted configuration integrates seamlessly with Quick Check Drive®
- Stores tread depth records to create customer history for use in marketing efforts
- No recurring monthly charge
Automatic Vehicle Identification

Standard, built-in cameras capture vehicle’s license plate as it enters or exits the Quick Check Drive® unit’s field of vision. Automatically determine OEM specs on most vehicles.

Catches front and rear license plates

Automatic Vehicle Identification

SmartPlate Alternative for Some Areas

Capture license plate image
Identify characters and locale
Obtain VIN*

Automatically determine vehicle year, make, model and alignment specifications

Powered by: CARFAX

Obtain vehicle identity*

SmartPlate requires an active HunterNet® account.

External Camera Available for Challenging Situations

Identify characters better, more often

Standard camera resolution
Optional Quick ID™ camera resolution

* See form 7604-T for a map of states with challenging license plates.
**OPTIONAL**

**Automatic Body Image Capture**

Using the same built-in high-definition cameras, the body damage cameras enable your shop to capture 40 or more images per vehicle in the same time it takes to check wheel alignment.

- Save your shop thousands of dollars in false vehicle-damage claims
- Immediate access to your body damage camera images — no need to contact a third-party surveillance company and wait for the images

**Use HunterNet® to quickly review vehicle images**

- Intuitive body damage camera interface displays vehicle information and date of service
- Four cameras capture an average of 10 images each
- 15-day image storage standard
- Premium 90-day storage package available

**Did you know?** Body damage cameras can save thousands of dollars per month on false damage claims. It is not uncommon for customers to be “mistaken” about when damage occurs.
Choosing the Right Alignment Inspection System

Hunter’s Quick Check Drive® is the industry’s first truly unmanned and repeatable touchless alignment check solution.

- Quick Check Drive® uses a total of 32 lasers and 8 cameras for unmatched accuracy
- Measure both camber and total toe to greatly increase alignment opportunities
- Integrated license plate cameras automatically identifies vehicle and alignment specifications

Did you know? Using a single set of measurements can lead to inaccurate results — meaning misinformed customers and missed service opportunities.
Choosing the Right Tread Inspection System

Hunter’s Quick Tread Edge® provides more information in less time with greater reliability than any other drive over tread depth system.

- Quick Tread Edge® provides unmatched accuracy and clarity of every tire from edge-to-edge
- Unsurpassed environmental protection means your Quick Tread Edge® works, rain or shine
- Produces stunning 3D images of every tire, every time with no stopping or labor required

Did you know? In a recent 25,000 vehicle study, 51% of all vehicles had no irregular tire wear, but needed an alignment.
Only 10% had irregular wear and needed an alignment.
Configurations for Every Shop

Integrate Quick Check Drive® with flush-mounted Quick Tread Edge® to build the most profitable unmanned inspection system.

Quick Tread Edge® can be installed individually as a surface- or flush-mounted unit.

Flush-Mount Quick Tread Edge® (with alternate WU572 console)
- Smooth approach
- Zero obstructions
- Compatible with Quick Check Drive®

Surface-Mount Quick Tread Edge® (with alternate WU572 console)
- Low stack height (3.4 in.)
- Simple installation
- Extended and angled kits available
  - Surface-mount not compatible with Quick Check Drive®

Site Considerations:
- Hardwired internet connection required for Quick Check Drive®
- Weather protection recommended as warranted by local conditions
- Impact protection recommended as warranted by lane layout
- Body cameras and vehicle ID performance require uniform and reasonably bright lane lighting
